

CASE STUDY:

BAXI Condensing Boiler

- Boiler: **BAXI 600**
- Type: **Condensing**
- Output: **26kW**
- Features: **Remote Thermostat**
Anti-frost pipework
A-Grade Efficiency
Mini Expansion Vessel

Requirements:

The homeowner had an oversized, costly and inefficient 35kW boiler in place. The unit was almost 15 years old and had failed due to multiple internal issues.

Following a room sizing assessment, a Baxi 600 26kW Condensing Boiler was chosen as the most appropriate replacement.

The installation was completed in one day and the customer is now enjoying more efficient and reliable heating with the ease of an ESI Remote thermostat offering remote and programmable heating.
